

Greetings-

On behalf of Magellan Rx Management, please see these quarterly communication documents outlining the drug changes for the upcoming quarter.

**Please note that going forward you will receive the Magellan Rx Standard Formulary and the Magellan Rx Precision Formulary documents in the same email every quarter.**

- If your clients/members have currently opted into the Magellan Rx **Standard** Formulary, it's important that you only distribute the [attachment related to that formulary](#).
- If your clients/members have currently opted into the Magellan Rx **Precision** Formulary, it's important that you only distribute the [attachment related to that formulary](#).

**Product Update Background:**

The Pharmacy and Therapeutics Committee (P&T), Therapeutic Assessment Committee (TAC), and Value Assessment Committee (VAC) meet periodically to review the status of each formulary and make recommendations. As a result of these periodic reviews, the Formulary may be modified. This update summarizes formulary and utilization management (edit) changes resulting from the committees' most recent meetings.

**Product Update Communications Plan:**

If applicable, members with a prescription for any drug moving to Tier 3 status will receive a personalized letter naming the drug and identifying formulary therapeutic alternatives (Tier 1 & Tier 2) within two months of the effective date of this change.

**Talking Points:**

The Pharmacy and Therapeutics (P&T), Therapeutic Assessment Committee (TAC), and Value Assessment Committee (VAC) make changes to the formulary to help ensure that plan members have access to quality, safe and cost-effective prescription benefits.

If you have any questions regarding these changes, please feel free to contact your Account Manager or Sales Representative.
